

Incentives

- Lack of time for hospital personnel is a common problem! (DRG?)
- The drugs that we get are for free!
- Less prestige in clinical research compared to basic research.
- Research on registers is a faster career, compared to randomized clinical trials...

Ethics committee

- EU regulations
 - There will be an ethics evaluation harmonization!
 - Unclear though

Patient organisations

- Need to better mobilize the patient organisations.
- Patient org have credibility requesting new medicines, and new trials
- Could do better in media! Tell the good stories. (not only patient organisations)

Late phase/follow up studies

- NO, DK increased number of phase IV, probably...
- The number of patients? ...the quality on the studies are of inferior qual...
- DK gov ->\$ in oncology early phase

The UK network idea

- This might be the way to go for the Nordics
 - Start on
 - orphan diseases???
 - Need massive population, though!
 - Children
- There is a general need for research nurses.

Common nordic IT infrastructure?

- Why have national IT infrastructure? Should be Nordic!
- At least SW has to "clean up at home"
- Same standards! For all Nordics.

Action to NTA

- Pressrelease what we have discussed.
- Media? No more crisis, rather communicate the positive part!
- Focus on markets, excellence, expose expertise...
- Invite global companies
- The clinical trial day, 20 may.
- Need new key opinion leaders. Who want to make a career in a crisis sector???
- In the companies, more internal marketing
